Marketing analytics professional with 2+ years of experience helping global CPG and financial-services clients understand what drives sales, brand performance, and marketing effectiveness. Experienced in Marketing Mix Modeling, media measurement, ROI analysis, brand analytics, promotions, and customer insights. Combines an MBA in Marketing with an M.S. in Business Analytics and hands-on experience in Python, SQL, R, Tableau, Excel, and statistical modeling.

PROFESSIONAL EXPERIENCE

HSD Metrics, Covington KY | Business Analytics Intern

Jun 2026 - Jul 2026

- Worked with stakeholders to understand what information sales teams needed during client conversations and translated those needs into a client-facing business case tool.
- Built a Python and Streamlit solution that estimated employee-turnover costs, addressable business impact, ROI, and payback scenarios and generated a one-page executive report.

Consultant, Marketing Analytics & Data Strategy | Kantar

May 2022 - Dec 2023

- Delivered 12+ analytics projects for global CPG and financial-services clients, using sales, media, pricing, promotion, distribution, customer, competitive, and economic data to explain business performance.
- Measured the performance of TV, YouTube, Facebook/Instagram, paid search, OOH, and in-store investments using Marketing Mix Modeling, ROI, response curves, elasticity, and channel-performance analysis.
- Led recurring Bank of America brand-equity analytics, combining media investment, brand tracking, YouGov metrics, CSAT/NPS, reputation, competitive activity, share of voice, and macroeconomic data to understand changes in Brand Favorability and Brand Consideration.
- Applied rolling averages, adstock transformations, and sequential regression to separate the effects of media, customer experience, competitive activity, and external factors on brand performance.
- Diagnosed a 15.8% year-over-year volume decline for a CPG portfolio and identified a 12% price increase and 7% distribution decline as major drivers of the change.
- Quantified growth opportunities from pricing, distribution, and media decisions, including 1.7% potential volume/value improvement from distribution and 1.2% uplift from media reallocation.
- Turned complex analytical results into clear recommendations for senior stakeholders on marketing investment, pricing, promotions, distribution, and customer strategy.

Marketing Intern | Mars International

Jan 2022 - Apr 2022

- Analyzed store-level sales and customer purchasing patterns to support promotion and merchandising decisions.
- Improved product placement and promotional execution across assigned stores, contributing to a 14% increase in sales.

EDUCATION

- | | | |
|---|--------------|----------|
| • Master of Science in Business Analytics University of Cincinnati | GPA: 3.9/4.0 | Aug 2026 |
| • Master of Business Administration in Marketing Sri Balaji University, India | | May 2022 |
| • Bachelor of Engineering in Electronics & Communication KLE College of Engineering | | Jun 2019 |

PROJECTS

Promotion & Commercial Performance Analytics | Python, Excel | University of Cincinnati

- Analyzed customer segments and 0-30% promotional scenarios within a \$100K budget to measure customer response, retention, sales potential, and profitability.
- Identified an 11.7 percentage-point lift in 90-day repeat purchase and 11% higher basket size and recommended targeted promotional strategies.

Sales & Financial Performance Analytics | SQL, Tableau | University of Cincinnati

- Analyzed location, volume, and margin performance using SQL joins, CTEs, window functions, KPIs, and Tableau to identify key commercial performance drivers.
- Identified that the top three locations generated approximately 71% of total margin while handling 63% of total volume and translated findings into business recommendations.

SKILLS
